#### Educational Study Tour 2022-2023

The department every year organize the educational study tour to great way for students to learn about subjects, cultures, and historical events in a hands-on and interactive way. These tours can take place locally and nationally depending on the goals and interests of the students. The tours organized take students to museums, zoos, aquariums, or natural habitats to learn about various scientific concepts and the natural world. During this academic year, study tour organized for B. Sc. I, II and III Zoology students in

**The New Palace Kolhapur Museum:** The Museum is housed on the ground floor of the New Palace- the current residence of Shrimant Chhatrapati Shahu Maharaj of Kolhapur. The museum has on display memorabilia belonging to the Kolhapur rulers which include royal apparel, jewelry, coins, weapons, silver elephant saddles, one of Aurangzeb's swords. A letter from the British Viceroy and Governor General of India are also a part of the collectibles to be seen. The magnificent Darbar Hall is in the centre of the Palace and the ambience has been recreated to give you a glimpse of Maratha history and its regal splendor. The side walls display lobed arches filled with stained glass illustrating scenes from the life of Shivaji; carved columns with temple-like brackets support the cast iron balcony above. A raised throne is at one end of the Hall. The Photo Gallery has many interesting pictures of royalty including one of the Maharajah with his hundredth dead tiger, elephant hunts and a series detailing how to train a cheetah.

**Gaushala Kaneri Math:** The Gaushala at Siddhagiri Math houses over 1000 cows of different indigenous breeds such as Sahiwal from Gujrat, Amritmahal from Rajasthan, Tharparkar from Andhra Pradesh and Khillari from Maharashtra. India used to have over 100 genetic varieties but over the period of time the number was reduced to just 35. At Siddhagiri Gau Shala, over 25 breeds are taken care of under one roof. At Gau Shala, one can find the breeds such as Amrut Mahal, Sahiwal, Geer, Devni, and Gidda which were on the verge of extinction.

The Gaushala has proved beneficial in more ways than one. Due to Gaushala, now, the Math has a sustainable energy source in the form of biogas. The Math also conducts seminars for farmers and individuals and guides them regarding how to install and run the biogas plant and avail the benefits of this renewable energy source. The Math houses India's first of its kind initiative called Gau-Bank. At this bank, farmers can donate their ageing or ailing cows. Gaushala treats all such cows and restores their health to normalcy. On the other hand farmers can also take home cows from Gaushala for rearing and if that cow begets a calf, the farmer has to return the calf to Gaushala in the form of an interest. This bank has certainly proved beneficial in curbing the practice of sending these cows to butchers.

# Macro Economics

Q.1. Explain the definition, nature and scope of macro economics.

## → 1] Definition of Macro Economics —

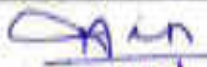

(1) Prof. Kenneth F. Boulding states that "Macro economics deals not with individual quantities as such, but with aggregates of these quantities, not with individual incomes but with the national income, not with individual prices but with the price level, not with individual outputs but with the national output."

(2) The above definition of Prof. Boulding is self revealing. It basically states that macro economics is not the study of individual units, but of the all individual units taken together. It is not a study of one family, but of all the families taken together.

## 2] Nature of Macro Economics —

(1) Macro economics is concerned with how macro economic variables or large aggregates like national income, employment, general price level, etc. are determined, what kind of relationship prevails between them and their behaviour overtime.

(2) As pointed out by the Prof. Gardner Ackley, macro economics studies the character of the forest, independently of the trees.

  
Principal  
Gopal Krishna Gokhale College  
Kolhapur.

which compose it. In other words, macro economics study is the study of the whole and not of the individual units that make the whole.

(3) Under macro economics the study is about how the equilibrium is attained in all sectors of the economy simultaneously, instead of the equilibrium in one sector of the economy.

(4) Instead of studying a sector or an industry or a market in isolation, all sectors or industries or markets are considered for study.

### 3] Scope of Macro Economics —

(1) National Income and Employment Determination — The theory of national income and employment determination constitutes the core of macro economics. Macro economics discusses both the classical and Keynesian theories of national income and employment determination.

(2) Problem of General Unemployment — Macro economic analysis provides us with useful insights into the problem of unemployment as experienced by both developed and developing countries. It studies the causes, effects and suggests remedies on the problem of unemployment.

(3) Economic Growth/Development — Economic growth is generally taken to mean increase in real national or per capital income. It enlists the ways to achieve higher economic growth.

Principal

G. K. Gokhale College

- (4) General Price Level — It looks into the matter of determination of price level in general. Both inflation and deflation are not desirable, thus macro economics suggests policy measures, both monetary and fiscal, to tackle these phenomena.
- (5) Trade Cycle — Economic growth has come about with ups and downs in it. These ups and downs, particularly in national income, employment and prices, are called trade cycle. The study of causes, nature, effects and remedial measures of trade cycle is an important aspect of macro economics analysis.
- (6) Foreign Trade — The international relations of the countries in the form of exports and imports of goods and services are known as foreign or international trade. Macro economics also studies the issues related with balance of payments wherein the record of international transactions is kept.
- (7) Public Finance — Government, in one way or another, intervenes into the functioning of economy and influences the level of economic activity for achieving some desired objectives. Government tries to steer the economy in the desired direction by employing some policy tools.
- (8) Policy Formulation — The objectives, formulations and implementations of various economic policies (like monetary and fiscal policy, etc) is another important area that macro economics is concerned with.

Q.2 Explain the various concept of national income

→ 1) Gross Domestic Product (GDP) —

(1) According to Samuelson and Nordhaus, "GDP is the name we give to the total market value of the final goods and services produced within a nation during a given time. It equals the total production of consumption and investment goods, government purchases and net exports to other lands."

$$(2) GDP_{MP} = P(Q) + P(S)$$

$GDP_{MP}$  = Gross domestic product at market prices

$P$  = Per unit market price

$Q$  = Gross output of goods

$S$  = Services

$GDP_{MP} = GNP_{MP} \pm$  Net factor income from abroad

$GNP_{MP}$  = Gross national Product at Market Prices

Net factor income = Sum of factor incomes such as rent, wages and salaries, interest and profits generated within the domestic territory of a country

2) Gross National Product (GNP) —

(1) GNP refers to the money value of production of final goods and services produced by the nationals of a country during a given period of time

(2) In other words, it is defined as "the total market value of all final goods and services produced in a year."

  
Principal  
Gopal Krishna Gokhale College  
Kulthi G.

(3)  $GNP = GDP + X - M$

X = income earned and received by residents within the boundaries of foreign countries

M = income received by foreign nationals within the country

$GNP = GDP + NFIA$

NFIA = Net factor income from abroad

### 3) Net National Product (NNP) —

(1) NNP is obtained by subtracting depreciation value from GNP. It means the market value of all final goods and services after providing for depreciation.

(2) Capital goods like machines, equipments, tools, factory building etc. get depreciated during the process of production. These capital goods get need replacement after some time.

(3) Net National Production = Gross National Product - Depreciation

$NNP = GNP - \text{Depreciation}$

National income = Wages + Rent + Profits + Interest = National Product

### 4) Personal Income (PI) —

(1) It is the sum of all incomes actually received by all individuals or households during a given year. The sum total of personal income is not always equal to the national income.

(2) Personal income = National income

- Social security contribution

- Corporate income tax

- Undistributed corporate profits

+ Transfer payments

Principal

Gopal Krishna Gokhale College  
Kolhapur.

### 5] Disposable Income (DI) —

- (1) Disposable income or personal disposable income means the actual income which can be spent on consumption by individuals and families.
- (2) Disposable income = Personal income - Personal taxes  
Disposable income = Consumption + Savings.

### 6] Per Capita Income (PCI) —

- (1) The average income of the people of a country in a particular year is called per capita income for that year.
- (2) Per Capita Income =  $\frac{\text{Gross National Product}}{\text{Population}}$

$$\text{Per Capita Income for 2011} = \frac{\text{National Income for 2011}}{\text{Population in 2011}}$$

$$\text{Per Capita Income at constant prices} = \frac{\text{National price at constant prices}}{\text{Population}}$$

$$\text{PCI at current prices} = \frac{\text{National price at current prices}}{\text{Population}}$$

### 7] National Income at Current Prices and Constant prices —

- (1) If the national income is estimated on the basis of prevailing prices, it is called national income at current prices.
- (2) If it is estimated on the basis of some fixed prices.
- (3) National Income at constant prices or Real national income =  $\frac{\text{National income at current prices}}{\text{Prices Index Number}}$

In the field of education, teaching and learning go side by side. Education is the only tool that aims to equip and empower its learners with the right knowledge. Activity-based learning is the baseline for creative and critical thinking skills enhancement. This research study was conducted to determine the effectiveness of activity based teaching on student's motivation and to measure the effect of activity based techniques on individual students' academic achievement.
