Date - / /2022

2.3 - Teaching- Learning Process

2.3.2 - Teachers use ICT enabled tools for effective teaching-learning process.

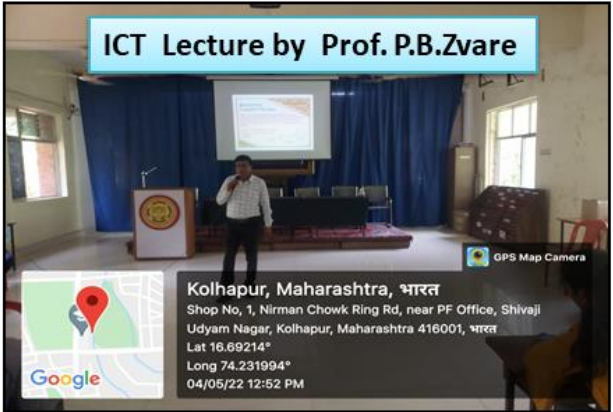

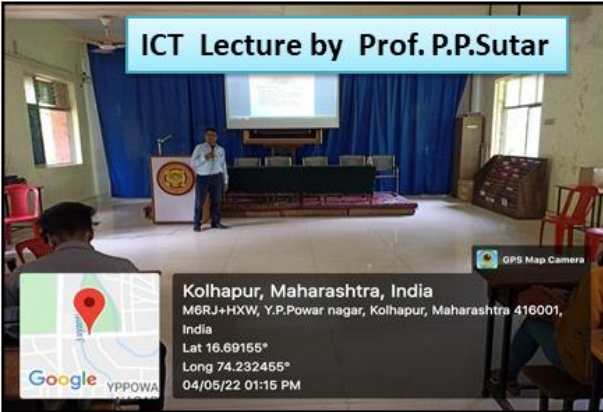

The college makes an effort to stay current with emerging technologies. The institute's teachers utilize technology in their education to the maximum capacity. For all students to meet high academic standards, teachers can utilize new digital technologies with the knowledge and expertise they already possess. ICT has made it possible to communicate more effectively and quickly and to offer ideas in ways that are meaningful and beneficial.

It is a useful tool for gathering material from many sources to aid students in expanding their knowledge base. The college offers ICT-enabled classrooms with desktops, laptops, projectors, and LCS to support e-learning. Teachers use and distribute electronic books, which are great for students since they are convenient and cost less than buying real books. Additionally, the college website offers video lectures given by faculty members on a variety of subjects. Teachers have access to e-resources via INFLIBNET through the library. This offers them the tools they need to do research. The college has a language lab and computer labs that are well-equipped. For subjects like computer application, mathematics, and statistics, the teachers attend practical classes. Teachers created and delivered PowerPoint presentations during the COVID-19 pandemic using a variety of online platforms, including Google Meet, Zoom, Google Classroom, etc. Additionally, the college's well-developed LCS produces teacher-made video lectures that are published on its You Tube channel.

Use of ICT
