A. ABOUT THE DEPARTMENT OF GEOGRAPHY

With the vision in mind, “Education of the welfare of the Masses” Honorable Prin. M. R. Desai and Honorable Barr. Khardekar gave birth to an educational institute, “The Shikshan Prasarak Mandal” in 1945. The Institute's milestone in the excellence of higher education was set up a Gopal Krishna Gokhale College in rural area. Within a decade college became well known multi faculty institute in western Maharashtra.

During 1969-70 the growing need and demand of specialization Honorable Prin. M. R. Desai offered Geography as a Principal subject to B.A. final year students. Science then about 25 students have offered Geography as special subject for last year. Prof. K. M. Keche, a well-known teacher was the Head of the Department at that time. Mr. M. K. Sawant M.Sc. Geography was the first class holder in Shivaji University joined as a lecturer on 15th June 1973 and became in charge of the department in June 1974. The vision, inspiration & facilities offered by Honorable Prin. M. R. Desai sahib gave present set up of Geography Department with separate well equipped laboratory during 1979-1980.

The tradition of Honorable Prin. M. R. Desai sahib is continued through Hon. Secretary Late Shri Diliprao Desai and Honorable secretary Prof. Jaykumarji Desai in the advancement of Geography Department, during nineties prin. C. D. Joshi's visualization and Prin. C. R. Godse's and Prin. Mrs. S. V. Desai's support boosted the growth to the department. Prin. S. D. Sathe along with office administrative staff of the college are keen format of the Geography Department intact. The trend is changing in the field of Geography Day by day.

In the academic year 2022-2023, Mr. S. A. Menashi, Head of the department. He has more than 28 years teaching experience. Dr. N.K. Susware, Mr. Y.D. Mardane, Mr. S. K. Rajpur and Mr. N.B. Sasane as CHB teaching faculty are working in the Department of Geography. All the staff members of Geography Department are working sincerely in

keeping academic standard and scholarly base intact, outcome is Geography become first choice among students.

B. ABOUT THE COURSE

The course starts with an introduction to land surveying leading to GPS as the state-of-art for surveying of land. Also, different aspects of GPS systems such as GPS architecture, GPS signals, GPS receivers, GPS software has been discussed followed by GPS positioning & GPS observables. It provides GPS processing fundamentals consisting of pre-processing and processing steps under different processing strategies followed by quality assessment and field procedure of GPS surveying. The course concludes with a detail demonstration of GPS field surveying followed by processing of collected data. This course is designed to provide up-to-date information and instruction about the global positioning system (GPS), treating in detail the functionality and its usage. Students will be able to understand the basic functions of GPS, how it works and how it can be integrated during navigation. This course is created for beginners, but can also be useful for experienced sailors. It's fast, simple and loaded with useful features and valuable information.

C. COURSE OBJECTIVES

1. To provide optimal insights into land surveying using GPS.
2. To understand the basic concept of GPS and Navigation.
3. To understand the Geodetic Datum's and Coordinate Systems.
4. To know the navigation and mapping through GPS.
5. To understand Real-Time Kinematic (RTK) GPS systems.

D. GAINING SKILLS

1. Understand the Basics of GPS:

Start by learning the fundamentals of GPS, including how it works, the satellites involved, and the accuracy of GPS positioning.

2. Get the Right Equipment:

To practice GPS skills, you'll need a GPS receiver. Nowadays, most smart phones have GPS capabilities, but you can also consider investing in a dedicated GPS device for more accurate and robust performance.

3. Learn GPS Navigation:

Explore GPS navigation software and apps such as Google Maps, Waze, or dedicated GPS navigation apps. Practice using these tools for directions and route planning.

4. Study Geospatial Concepts:

Understand geospatial concepts like latitude, longitude, elevation, and coordinate systems (e.g., UTM, WGS84). This knowledge is crucial for accurate GPS usage.

5. Outdoor Activities:

Engage in outdoor activities that require GPS navigation, such as hiking, geocaching, or orienteering. These activities will help to apply GPS skills in real-world scenarios.

6. Geocaching:

Geocaching is a great way to practice GPS skills. It involves using GPS coordinates to locate hidden "caches" in various outdoor locations.

7. Online Tutorials and Courses:

There are numerous online tutorials and courses dedicated to GPS technology and geospatial concepts. Websites like Coursera, edX, and Khan Academy offer free and paid courses on these topics.

E. REQUIRED TOOLS, EQUIPMENTS & SOFTWARE

The department of Geography have following GPS Instruments and other importance things.
