

GREEN AND ENERGY AUDIT REPORT (2021-22)

Suggestion and remarks by the auditor

Green Campus Audit-

- 1) Present plantation is helping to minimize dust and sound pollution. It will help to remove sound pollution. Shade loving plants can be added in the campus to cover ground (Balsoms, pepper, sygonium, Bramhi, Beithe vine, poths, and sensivera.)
- 2) Keep record of waste management.
- 3) Paperless strategy should be practiced by office to inform staff notice.

Energy Audit-

- 1) Organized workshop & energy consumption for students.
- 2) Few top floor new classroom can be connected with solar panels as non conventional energy sources is need to save electricity for sustainable electricity management.
- 3) Students give the projects of energy consumption.

Waste Management-

- 1) Dust pollution and sound pollution record can be maintained.
- 2) For the zero waste management projects use the plastic buckets.
- 3) Develop waste management model.
